Subject: Re: FW: PREVENTION OF HYPONATRAEMIA IN CHILDREN RECEIVING
INTRAVENOUS FLUIDS

Dear Miriam,

Just to confirm I am happy with the latest draft which I received today. The only query I have is whether there is a need to mention that care must be taken to ensure that Kgs aren't confused with lbs when weighing a child on scales which give both measurements. Bob Taylor mentioned there have been some near misses from staff making errors in this way.
Kind regards,
Fiona.
