Dear Dr Scott

Re: Adam Strain [REDACTED]

I am happy to say that Adam has recovered well from his recent pseudomonal urinary tract infection. He finished 5 days of Azlocillin and a repeat urine culture 2 days off treatment has come back clear.

He has remained well and has had no pyrexia. He is presently on Sodium Bicarbonate 12.5 tds, Ferromyn 5mls bd and Nitrofurantoin 2.5mls nocte.

Urine sample demonstrated + protein and ++ glucose. There has been some leakage from his gastrostomy site and I am looking to arrange a gastrostomy button, which will hopefully alleviate this problem.

We will see him again in 6 weeks time.

Yours sincerely

N Rollins
