Dr. Scott  
The Surgery

Dear Dr. Scott,

RE: ADAM STRAIN

Adam has got over his recent infection. We await further investigations from the Urology point of view and to this end I have written to Mr. Brown and Mr. Boston today who are due to arrange that shortly.

He should continue on Ferrromyn 1ml twice a day, Ranitidine 30mgs three times a day. He has been on this since December and I would propose stopping it at Easter. He is on Sodium Biocarbonate 8.4% solution 7.5mls three times a day and Cisapride 20mgs three times a day.

He should continue on prophylactic Keflex 125mgs at night.

Yours sincerely,

*Maurice*
