Dear Dr. Scott,

RE: ADAM STRAIN [REDACTED]

We continue to have problems with recurrent pseudomonas infections with Adam. He is due to come in for a retrograde pyelogram and surgical review by Mr. Brown and Mr. Boston, hopefully in ten days time.

In the meantime he should finish his course of Ciproxin and then stay on Keflex until he is admitted. When he comes in we will check his urines and his renal function.

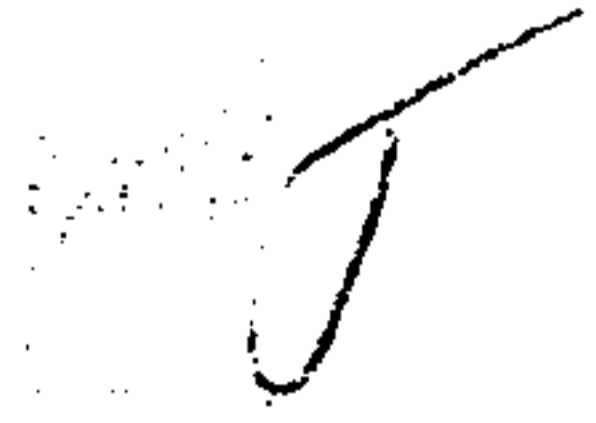

Yours sincerely

MAURICE SAVAGE
Consultant Paediatric Nephrologist
