Dear Mr. Walby and Dr. Humphrey

CONOR MITCHELL, DECEASED

Dr Sumner has contacted me about the medical notes he has received although he does not say whether they are the notes from the Royal Victoria Hospital or Craigavon Area Hospital. In any event he is concerned at an omission stating that "there are no notes for the vital period from the medical ward at Craigavon from the time of his admission to when he had the seizure. There are no details of the IV therapy when he was admitted, dehydrated nor any of the biochemical results relating to that period."

I should be grateful if you would arrange for Dr Sumner to receive these important medical records as soon as possible. If there is any particular difficulty please advise me of it as soon as possible.

Yours sincerely

J L Leckey
