

CORONERS ACT (NORTHERN IRELAND) 1959

Deposition of Witness taken on Monday the 25th day of April 2006, at inquest touching the death of CLAIRE ROBERTS, before me Mr J L Leckey, Senior Coroner for Northern Ireland as follows to wit:-

The Deposition of Mr Alan Roberts

Who is being sworn upon his oath, saith

I am the father of Claire Roberts and at the request of Mr J L Leckey, Senior Coroner for Northern Ireland, I prepared a statement relating to her illness, subsequent treatment and care management at the Belfast Royal Hospital.

I now produce my report marked Exhibit C 1.

Mr. McCrea : The history in the post-mortem report is not accurate. I believe her symptoms were not typical of diarrhoea. She had only one loose bowel movement. There was no frequency of loose bowel movements. She was well until she was at school on Mon 2nd October 1996. If she had been unwell she would not have been sent to school. The teacher made a note in her homework book that she was unwell. Her cousin had a tummy upset - not vomiting + diarrhoea. Claire did not start to vomit. Hypotension was marked at a meeting with doctor on 7th December 2004. Claire did not have a seizure on the Sunday. I believe the drop in sodium level caused Claire's death.

TAKEN before me this ^{25th} day of April 2006

J. L. Leckey

Senior Coroner for Northern Ireland

J. L. Leckey

CORONERS ACT (Northern Ireland), 1959

Deposition of ~~Witness~~ taken on _____ the _____ day
of _____ 20 _____, at inquest touching the death of _____
_____, before me
Coroner for the District of _____

as follows to wit: -

The Deposition of ALAN ROBERTS

of _____

(Address)

who being sworn upon h _____ oath, saith

to me advised Glasgow coma scale to us at about fluid management. We were told there had been a fluid build-up in Clairey brain which was putting pressure onto brainstem that led to a respiratory arrest. *Robert*
