Please find below email from Angela which was sent to all F1 and F2's as well as FPD and educational supervisors. This link is now available on the NIMDTA website www.nimdtg.gov.uk. I would appreciate if you would ensure your Foundation Trainees have completed this.

If you have any other queries please contact me.

Regards

I have been directed by Dr T McMurray to ensure that all Foundation doctors complete an on line learning module as recommended by a working party headed by Dr Maura Briscoe who is responsible for Safety and Quality and Standards at DHSSPS.

This module is available at <http://learning.bmj.com/learning/search-result.html?moduleId=5003358>. Completion of this specific on line module is required and has been included in F1 and F2 sign off for July 2008 - copy of certificate to be attached showing module has been completed.

All new F1 doctors who commence Foundation in August 2008 will also be required to show proof of completion of module with 4 weeks of commencement of their F1 post.

Yours sincerely

A.M. Carragher
