iii. Hyponatraemia

Dr McConnell highlighted a recent death in Altnagelvin Hospital of a child due to Hyponatraemia caused by fluid imbalance. Current evidence shows that certain fluids are used incorrectly post operatively. It was agreed that guidelines should be issued to all units.

Dr Stewart informed that workshops on "Review of Community Care" would be held 15 and 17 August 2001.

There being no other business CMO thanked everyone for their participation and closed the meeting.
