Andrew

I enclose herewith a rough draft of suggested terms of reference which will probably be unrecognisable when finally settled. However it occurs to me that some of the issues may already be the subject of the Harold Shipman Inquiry which I think is due to release its 5th Report in the near future. It may be that that Inquiry centres more on the involvement of GPs rather than the proper way to review deaths in hospital but it might be worth checking with Dr Carson as to whether or not any of the Shipman reports might be relevant.
