**Subject:** FW: UTV programme.

Maire I tried to ring there but couldn't get you. Do you know what date this programme went out? We have it down as 27th February - in any case we have the programme and CMO only refers to untoward deaths happening every 5 or 10 years and does not mention hyponatraemia. I'll let you know what happens.

Clare

Clare,

Thanks for getting me back to me so promptly.

However, I have another question for CMO in relation to our ongoing investigation:

In an interview for UTV's Insight on 17th February, 2003, following the inquest into the death of Raychel Ferguson, Dr. Henrietta Campbell stated:

"In the Health Service in Northern Ireland over the last 10 years, I am not aware of any case of hyponatraemia in a normal healthy child."

Question: Does it remain Dr. Campbell's view, that in February, 2003 she was not aware of the death of a normal, healthy child as a result of hyponatraemia?

Again, I would appreciate a quick response.

Best wishes,

Trevor.
