Wednesday 12/4/00
Night Duty.

ONE OFF
8 - MAY

7.45 - Report.

Told by S/N M. Dowell of Lucy Crawford admission.

8.20 Approx: - Went to Treatment room Inside was

S/N M Burns Dr Malik Mr + Mrs

Crawford Lucy I introduced myself
to the parents and S/N Burns left.

Dr Malik found a small vein in
Lucy's (L) foot and inserted a venflon
He obtained a blood sample and flushed
the venflon with Hysol at this time the vein
collapsed it was then removed as it was
not acceptable for I.V. fluids access.

I remained in the treatment room with Mrs Crawford
and Lucy as Dr Malik went to phone Dr O'Donoghue
and asked him to come to the ward.

Lucy was given orange juice in a cup Approx 80.
Lucy passed urine into a specimen bag and a
sample was tested by myself which had protein
and ketones. The rest of the urine was placed
into a white top container and was left ready
to be sent to the Lab. I checked Lucy Temp.
and it was still high so I gave her 1.2

Parecetamol 120 mgs in the presence of her Mother.

Dr O'Donoghue came to the ward - He requested
Elma cream be applied to both Lucy's hands which
I did while we waited for the cream to

work I made up a drink of Dicalyte and gave
Lucy 100mls which she drank. She asked for a
drink which her Mother gave her.

Dr O'Donoghue then inserted a syringe into Lucy's hand and flushed it with Heparin. I connected the i.v. line and I was instructed by Dr O'Donoghue to run the fluids at 100ml per hr. until Lucy has passed urine. In the presence of Dr O'Donoghue Dr Malik, myself Mrs Crawford and Lucy I connected the line to the drip chamber and took Lucy and Mrs Crawford to cubicle 6 Medical side. Lucy vomited + + + bile colour fluid, she remained sleepy but her temp settled. Mr Crawford and Lucy's sister then came into the cubicle. This was approx 10.45 AM and after this point I had no direct contact with Lucy.

After this time I attended to the other patients on the ward.

At approx 2.45 PM I was attending another patient with S/P Mr Mann. SA Edmondson came into the ward and came to speak to us in the side-room.

E/P Mr Caffrey came and told us Lucy had a large bowel motion. S/P Mr Mann, SA Edmondson and E/P Mr Caffrey went to assist Lucy and her mother. Lucy was then moved into a side-room.

Approx 2.50 PM I was still in the side-room when E/P Mr Caffrey called for help. S/P Mr Mann, SA Jones went to her assistance.

The patient I was with had settled so I came out to attend to the other patients.

I seen the emergency trolley been pushed down the ward so I followed. As I reached the door of the side-room Mrs Crawford asked me to show her husband which I did.

I let Mr Crawford and his daughter into the ward. SA Edmondson also entered the ward and attended the Crawford family.

Lucy's sister phoned and later her grand parents
came to the ward.

In the meantime I continued to attend the other
patients.

Lucy's sister felt faint I took her to the day
room I gave her a glass of water and
set her down by the window.

Her grand parents were in attendance

At this point I continued to attend the rest
of the ward.
