

Appendix 9.

Mr. Fee.

Enclosed is my account of what
happened on the night of the 12th April
I hope it is of some help to
you

S/O B Swift
Childrens Ward.

Wednesday 12/4/03
Night Duty.

U.S. DEPT.
8 - MA.

7.45 - Report.

Told by S/N M. Dowell of Lucy Crawford
admission.

8.20 Approx. - Went to treatment room inside. was

S/N M. Burns Dr. Malik Mr. & Mrs.

Crawford Lucy. I introduced myself
to the parents and S/N Burns left.

Dr. Malik found a small vein in

Lucy's (L) foot and inserted a venflon
He obtained a blood sample and flushed

the venflon with heparin at this time the
catheterised it was then removed as it was
not acceptable for IV fluids access.

I remained in the treatment room with Mrs Crawford
and Lucy as Dr. Malik went to phone Dr. O'Donoghue
and asked him to come to the ward.

Lucy was given orange juice in a cup approx 80.
Lucy passed urine into a specimen bag and a
sample was taken by myself which had protein

and ketones. The rest of the urine was placed
into a white top container and was left ready
to be sent to the Lab. I checked Lucy temp.

and it was still high so I gave her 1.2

Paracetamol 12.5mg in the presence of her Mother.

Dr. O'Donoghue came to the ward - He requested
Elna cream be applied to both Lucy hands which

I did while we waited for the cream to

work. I made up a drink of Dextroglucose and gave
Lucy 100mls while she drank. She asked for her

043-073-151

Dr. O. Donoghue then inserted a syringe into Lucy's hand
and flushed it with ~~heparin~~. I connected the i.v. line
and I was instructed by Dr. O. Donoghue to run the
fluids at 100 ml per hr. until Lucy had passed urine.
In the presence of Dr. O. Donoghue, Dr. Halik myself
Mrs. Crawford and Lucy, I connected the line to
the drip chamber and took Lucy and Mrs. Crawford
to cubicle 6 Medical side. Lucy vomited + + + bile
colored fluid, she remained sleepy but her temp
settled. Mr. Crawford and Lucy then came into
the cubicle. This was approx 10:45 PM and after
this point I had no direct contact with Lucy.

After this time I attended to the other
patients on the ward.

At approx 2:45 AM I was attending another patient
with S/P Mr. Martin. Sr. Edmundo came into the ward
and came to speak to us in the side-room.
E/P Mr. Coffey came and told us Lucy had a
large bowel motion. S/P Mr. Martin, Sr. Edmundo
and E/P Mr. Coffey went to assist Lucy and her
mother. Lucy was then moved into a side-room.

At approx 2:50 AM I was still in the side-room
when E/P Mr. Coffey called for help. S/P Mr. Martin,
Sr. Jones went to the other patients.

The patient I was with had settled so I came
out to attend to the other patients.

I saw the emergency trolley been pushed down
the ward so I followed. As I reached the
door of the side-room, Mrs. Crawford asked me
to show her husband what I did.
I let Mr. Crawford and his daughter into the
ward. Sr. Edmundo also entered the ward and
attended the emergency patient.

043-073-152

Lucy's sister phoned and later her grand parents
came to the ward.

In the meantime I continued to attend the other
patients.

Lucy's sister felt faint I took her to the day
room I gave her a glass of water and
sat her down by the window.

Her grand parents were in attendance

At this point I continued to attend the rest
of the ward.
