Operation Performed Insertion Central Line, Cystoscopy & Retrograde Pyelogram. Date 29/5/92

Surgeon Mr W A McCallion / Mr R J Stewart / Mr S Brown Anaesthetist Dr McCarthy / Crean

Assistant Sister Malcolmson

Incision

Indication: Pre base bilateral ureteric reimplant. Left ureter sloughed?

Findings requiring left to right TUO now presents with recurring UTI's

query due to obstructive uropathy. Requires long term antibiotics.

1) Insertion Broviac Line into left common facial vein. Transverse cervical incision. Left common facial vein identified, entering left internal jugular. Left common facial vein approximated with 5 X 0 PDS.

vein and then internal jugular. Broviac line inserted into left internal jugular vein and then internal jugular.

in proximal SBC. Neck wound closed in layers of 5 X 0 PDS and wound anterior chest wall closed 5 X 0 PDS.

2) Cystoscopy using 30° telescope and 11 storz sheath. The right ureteric orifice was identified in the mid line approx at the level of inter ureteric bar. No lesion was found within the bladder. The UO was easily catheterised with a size 3 ureteric catheter. The cystoscope was withdrawn and the baby returned to X-ray for retrograde pyelogram.
