DETAILS OF CONSULTANT EPISODE;
NOTES ON COMPLETION

(Proforma to be retained in patient's chart; and completed in full before patient is transferred or discharged.)
(When an item is entered on computer, indicate with initial & tick.)

SOURCE	TITLE	COMMENTS	FIELD
Data from PAS & Chart	Patient Number		12X
	Patient Name		33X
	Date of Birth		8X
	Sex (m/f)		1X
	Consultant		7X
	Ward		4X
	Admission Date (Date episode commenced)		8X
	Discharge Date (Date episode ended)		8X
	Height (metres/to two decimal points)		4X
	Weight (kilos/to two decimal points)		5X

Manual Data	Date Fit for Discharge	Reason for Reversion	Initial Diagnosis and date drawn from presenting Complaint	(Determined by Consultant)
				8X

Principal Operation	When performed (date)	Conducted during the episode, one must be designated by the consultant as the Principal Operation.
		7X

Secondary Conditions	(Other conditions present during episode which may or may not be related to the Main Condition, and may or may not be treated during the episode.)
	7X

Complications	(Complications occurring purely as consequences or side-effects of the treatment process: these must not be labelled as a diagnosis, regardless of cost of treatment for them.)
	7X

Drugs on Discharge	(Drugs prescribed for the patient on leaving consultant's care. Information required: name/strength of drug; dosage; frequency; method.) Dose means the amount of the drug to be taken. Freq — Latin abbreviations must be used. Method — means how drug is to be taken or applied (eg. Aspirin (100mg), 2 tablets x 4 times x Daily)
	8X

Discharge Note Commentary	(Medical notes relevant to case. This will not be retained on memory by computer after printing.)
	320X
