Dear Dr Scott

re: **ADAM STRAIN**  
**DOB 4.8.91**

Adam was reviewed today at the Renal Clinic. He has been keeping quite well since last seen and has had no problems with low grade temperature or with urinary tract infections. As you know he is on nocturnal prophylactic dose of antibiotic as well as sodium bicarbonate.

On examination today he looks quite well. Blood pressure 80/40. I will arrange for him to have his blood taken today. Weight today is 12.5 kgs which lies just outside the 97th centile. He was also seen by the Dietician and we have arranged to see him again in 6 weeks.

Yours sincerely

DR M BARAKAT
