Dear Dr. Scott

RE: ADAM STRAIN [REDACTED] **DOB 04.08.91**

Adam was at the Dialysis Clinic this morning. There is a little problem with dialysis drainage into the peritoneal cavity. We are going to try and free this up this morning by instilling pure Heparin or Urokinase into the catheter to see if we can get back on to a regular regime. Otherwise his treatment is unchanged. He is well enough [REDACTED]

Yours sincerely,

MAURICE SAVAGE
Consultant Paediatric Nephrologist
