RELATIVE COUNSELLING RECORD

NEXT OF KIN/THOSE LIKELY TO VISIT:-			COUNSELLOR	EXPLANATION	EVALUATION
DATE	RELATIVE SEEN				
13.4.00	parents.	Dr Hanrahan	Dr Hanrahan explained that the reason + eeg that weny had today showed that her brain isn't working as it should be and that weny will die. There is no satibily going on within her brain. The next step is to do brain stem tests to confirm this and then remove weny from the ventilator - it was decided that we should wait until tomorrow to do these tests and following discussion with both parents it was decided that weny will not be for any resuscitation or further should her condition deteriorate.	 srs. Brumby
