FOR  
GREATER BELFAST

- 3 MAR 2003

RECEIVED

2 Dr Geon

Noted  
HWS  
3/3/03**Lucy Crawford Deceased**

The enclosed leaflet explains the role of the Western Health and Social Services Council in providing support to people who wish to complain about Health and Social Services.

In the spring of 2000 I was contacted by the parents of a **Lucy Crawford** (DOB 5-11-98). Lucy was taken ill on 12 April 2000 and was admitted by her GP into Erne Hospital Enniskillen with a relatively minor condition of vomiting. A drip was set up and the family was assured Lucy would be home next morning. During the early hours of 13 April 2000 Lucy fitted and collapsed. She was transferred to the Royal Belfast Hospital for Sick Children on a life support system. On 14 April 2000 the life support was switched off. A post mortem examination was undertaken and a "swollen brain with generalised oedema" was discovered.

In my supporting role I arranged for the parents to meet the Consultant Pathologist who conducted the PM. I also contacted the Coroner's Service to ask about the arrangement of an Inquest but I was told it was not necessary.

Following the Raychel Ferguson Inquest I with other Members of the Western Health and Social Services Council received a briefing on the Events which led up to Raychel's death.

I was struck by the similarities in the two tragedies and in particular the details of the solutions used in the drip set up for Lucy Crawford which are clearly recorded in the Medical Notes I hold (as supplied by Erne Hospital).

You will appreciate my concerns over the cause for the death of an 18 month old little girl which were to my mind unexplained were rekindled by Raychel's death.

I am left with two questions which you may be able to answer.

- (1) Are there direct parallels in the events leading up to the deaths of both girls.
- (2) Would an Inquest in 2000/2001 have led to the recommendations from the Raychel Ferguson Inquest being shared at an earlier date and the consequent saving of her life?

I am also left with a query as to other similar uncovered deaths across the UK. At least the Altnagelvin Medical Team have "broadcast" the phenomena of Hyponatraemia and raised an awareness of the potential problem with children.

Your advice on the foregoing would be appreciated.

Yours sincerely

  
Stanley E Millar  
Chief Officer
