

PICU CAREPLAN RBHSC

NAME: Rachel Ferguson						HOSP. NO. 476556						DAY NO. ①						DATE: 9/6/01.					
SUMMARY: 9 ya old girl transferred from AltraGelw Hosp Intubated & ventilated, fixed dilated pupils, unresponsive size 7. rigid reflex? encephalitis? meningitis? hyperventilation H/O apnoeic seizure on 7/6/01. This was immediately followed by severe tonic-clonic - severe unresponsive seizure. A/c 118.																							
ASSESSMENT OF CONDITION/NEEDS												GOALS AND PLANNED CARE											
1. PHYSICAL																							
(A)	Respiratory		A	2	3	4	5	Monitor ventilation*		A	2	3	4	5									
Intubated & ventilated								Secretions Im.								Saline suction x 4 hrly.							
On SIMV PC+PS. Caud 6.0 cuff @ 20 cm H ₂ O.																							
Monitor resp rate ABGs + ET CO ₂ monitoring																							
A SIMV (PC+PS)																							
(B)	Cardiovascular		A	2	3	4	5	Continuously monitor cardiovascular status		A	2	3	4	5	Record vital signs hrly.								
IA (LA) arterial brachial																							
Hypothermic O/A. - warming blanket applied & skin probe.																							
12 Central line (R) subcutaneous																							
CVP measurement.																							
(C)	Pain/Sedation		1	2	3	4	5	Ensure labeled is painfree and relieve anxiety		1	2	3	4	5	Administer analgesis and sedation as prescribed								
(D)	Neurology		A	2	3	4	5	Observed signs of neurological deficits		A	2	3	4	5	Reconfirm G.C.S. at start of each shift and/or hrly.								
G.C.S. = 3								Pupil size = 7 unreactive															
Hyper neurological observations.																							
A Brain stem test @ 5pm - report @ 9am.																							
Continuum symbols																							
Morning 8am ●						Evening 2pm ▲						Night 8pm ◆						2am					

(E)	Nutrition/Hydration	1	2	3	4	5	Record intake hrly. Record D.M. stix x	1	2	3	4	5
NUTRITION ASSESSMENT SCORE (8)												
8/3 fluid restricted - 43mls/hr. Weigh x N/A.												
On 0.9% NaCl.												
On free clearance.												
(F)	Elimination	1	2	3	4	5	Aspirate nasogastric tube x	1	2	3	4	5
Ureter catheter size 10 inserted.												
SPT of DDAP.												
(G)	Skincare/Wound Care	1	2	3	4	5	Ensure (Cachet) skin is clean and healthy.	1	2	3	4	5
Mobility												
Hygiene												
(B) Dec. crest incision covered & negated.												
Eyes red & dry - hypophthalmos eyelids												
& lacri-ubed antment applied.												
Tum x 2 hrly, use manual handling aids as required. Pressure area care x 4 hrly												
(II)	Psycho/Social/Cultural	1	2	3	4	5	Provide (Cachet) parents/relatives with support and information	1	2	3	4	5
(III) Circumstantial
