Sensitivity: Confidential

Bridget,

As discussed this requirement was in the Chairman's letter to everyone dated 1st Nov.

My ability to do this for my system was delayed due to the non availability of the laptop.

I have discussed with Frank Curran to-day as I was not sure who had completed this task. He agreed to discuss with Tom and identify who would still be required to sift out the files into an electronic folder. He agreed to contact them and arrange for these folders to be copied electronically appreciating the Fri. deadline.

Hugh

Alphy maginnis has raised the issue of sorting the content of the above from the hard drive copies made by George. John O'Hara wants indexed files, question is, as is, the hard drives contain all transactions on pcs. this will include personal and trust business info not material to the inquiry. Alphy IS SAYING WE SH'D NOT JUST HAND THESE OVER AND RECOMMENDS SOME SIFTING/SORTING.

Question is how, by whom and how quickly...deadline is the end of this week. Briege is it technically possible to simply do a search for items with lc ref, will this id all relevant correspondence, could this then be put onto an e file??? would we wish/need to screen for sensitive references???

The whom: sh'd it be done in house, any issues of independence? alternatively could it be done by csa IT people or the inquiry team by giving them security pass to restricted info on the lc case.

We probably sh'd have thought ourselves ahead with this issue??? but we are where we are. URGENT
NEWS/ADVICE REQUIRED. I'VE SAID I'D GET BACK TO DLS IN TOMMOROW WITH OUR THOUGHTS.

BRIDGET
