Miriam,

I spoke to DMB in NISRA just to confirm that underlying cause of death is the primary cause of death. They confirmed that it is.

The England & Wales figures are attached. I will work out the rates as a proportion of total deaths and get back to you asap.

Jim McColgan

Dear James

Please find the data requested attached below:  
(See attached file: PQ NIDHSS - hyponatreamia.xls)  
Data are not available before 1993 for mentions.

Yours sincerely

Anita Brock

related deaths

To: Anita  
cc:  
Subject: FW: hyponatraemia-

Anita,

I tried reaching you by phone but must have the wrong number.

I am looking for some background information to support a PQ I have on hyponatraemia related deaths. I obtained figures from NISRA (GRO) here in NI for hyponatraemia and fluid overload deaths registered each year from 1984 to 2003.

The ICD-9 codes used were 276.1 and 276.6 for the years 1984 to 2000 and ICD-10 codes E87.1 and E87.7 for the years 2001 to 2003.

Could you provide the figures for 1) primary diagnosis only and for 2) where any secondary diagnoses included the codes.

Unfortunately I need this information urgently, so if you can provide part 1 today I would greatly appreciate it and maybe follow up with part 2 as soon as you can.

Could you also copy your response to Gillian.

My number is if you need to speak to me.

Thanks again.
