Miriam

thanks for getting back to me. I have copied the children's Hyponatraemia poster in A4 size to relevant depts. However, the website states the guidance has to be ordered. 6 copies of the children's guidance would be fine and 6 adults. Larger posters would also help approx 10 of these should meet our needs.

Many thanks
Roberta

Roberta,

I understand you needed copies of the hyponatraemia guidance. Did you want the paediatric or adult guidance? Both are available on the website (adult in CREST section) but if you need the posters they can be mailed to you this may take a week as we are going to laminate some more of the A2 size posters. Just let me know what you require.

Miriam
