

From: Andrew Hamilton

Date: 2 November 2004

Angela Smith

Summary

Issue: Cllr John O'Dowd MLA has written to you indicating that a full independent inquiry should be held into the issues raised by the recent UTV Insight programme.

Timing: Urgent.

Recommendation: Reply as in the attached draft.

Background

1. In April 2000, Lucy Crawford, a 17-month-old child, died following admission to the Erne Hospital and subsequent transfer to the Royal Belfast Hospital for Sick Children. The cause of death as recorded on the death certificate issued shortly after her death was "Cerebral oedema, Gastroenteritis, dehydration". Subsequently a Coroner's inquest into her death, completed on 19 February 2004, concluded that Lucy died from:
 - (a) Cerebral oedema, (b) acute dilutional hyponatraemia, (c) excess dilute fluid.
2. Hyponatraemia (a low sodium level in the blood) is known to be a risk in any child receiving prescribed fluids. It is potentially extremely serious, with a rapid fall in sodium leading to cerebral oedema, seizures and possible death. Hyponatraemia most often reflects a failure to excrete water. Stress, pain,

nausea and vomiting are all potent stimulators of a hormone, ADH, that inhibits water excretion. Therefore a sick child, if given excess fluids, may not be able to excrete water adequately. The retention of water may, in severe cases, lead to cerebral oedema (swelling of the brain) and ultimately death.

3. Lucy Crawford was admitted to the Erne Hospital on the evening of 12 April 2000 with poor oral intake, fever and vomiting. At that time a presumptive diagnosis of a viral infection was made. She was dehydrated and required intravenous fluids, which were commenced about 10.30pm. At about 3.00am on 13 April Lucy collapsed, and was transferred to RBHSC at 6.00am, but in a moribund state. She was pronounced dead at 13.15pm on 14 April.
4. Lucy's death was reported to the coroner's office. Advice was sought from the State Pathologist's Department regarding the need for a coroner's post-mortem examination. Following discussion between the state pathologist and a consultant paediatrician at the RBHSC, it was agreed that a coroner's post-mortem was not required and a death certificate could be issued. A Hospital post-mortem was conducted.
5. The Sperrin Lakeland Trust conducted an internal review into Lucy's death, concluding that neither the post-mortem nor an independent medical report provided could fully explain Lucy's deterioration. Specifically the review commented that the fluids Lucy received were, in both type and amount, within the accepted range, but cited poor record keeping as leading to confusion over prescribed fluids.
6. It was only in February 2003 following the inquest into Raychel Ferguson's death that the coroner was alerted to the similarities between Lucy Crawford's case and that of Raychel Ferguson a nine year old who had died from hyponatraemia. Subsequently an inquest was opened into Lucy's death and an inquest held in

February 2004. To summarise, the sequence of events following Lucy Crawford's death and its reporting were as follows:

April 2000	Lucy died
June 2001	Raychel Ferguson died. Death reported to coroner.
March 2002	CMO issued guidance on prevention of hyponatraemia.
February 2003	Inquest into Raychel Ferguson's death.
March 2003	Links between Raychel's and Lucy's death identified.
February 2004	Inquest into Lucy's death.

7. Detail of the conduct of the consultant paediatrician involved in Lucy's management has been referred to the General Medical Council, which will, through its normal procedures, consider the case and whether there are grounds for disciplinary action.
8. In 2000, at the time of Lucy's death, the statutory Duty of Quality on HPSS providers had not been introduced. The Trust did however take steps to investigate the reason for Lucy's death. A case review was conducted and a paediatrician from Altnagelvin Hospital was invited to act as a medical assessor.
9. The UTV Insight Programme broadcast on Thursday 21 October raised a number of allegations about the treatment of Lucy Crawford and the subsequent investigation into her death. These included specific references to the actions of individual doctors, the management of Sperrin Lakeland Trust and the Department's Chief Medical Officer.
10. In light of the allegations contained in the 'Insight' programme you announced an independent investigation into the issues raised by it on 1 November.

Recommendation

That you reply as per the attached draft.

Dear John

Thank you for your letter of 22 October.

I believe it is of the highest importance that the general public have confidence in the quality and standards of care provided by our health and social services.

Consequently, as you may be aware, I announced on 1 November that I have appointed Mr John O'Hara QC to conduct an independent inquiry into the deaths of Lucy Crawford, Raychel Ferguson and Adam Strain.

*Sincerely
Angela*

22nd October 2004

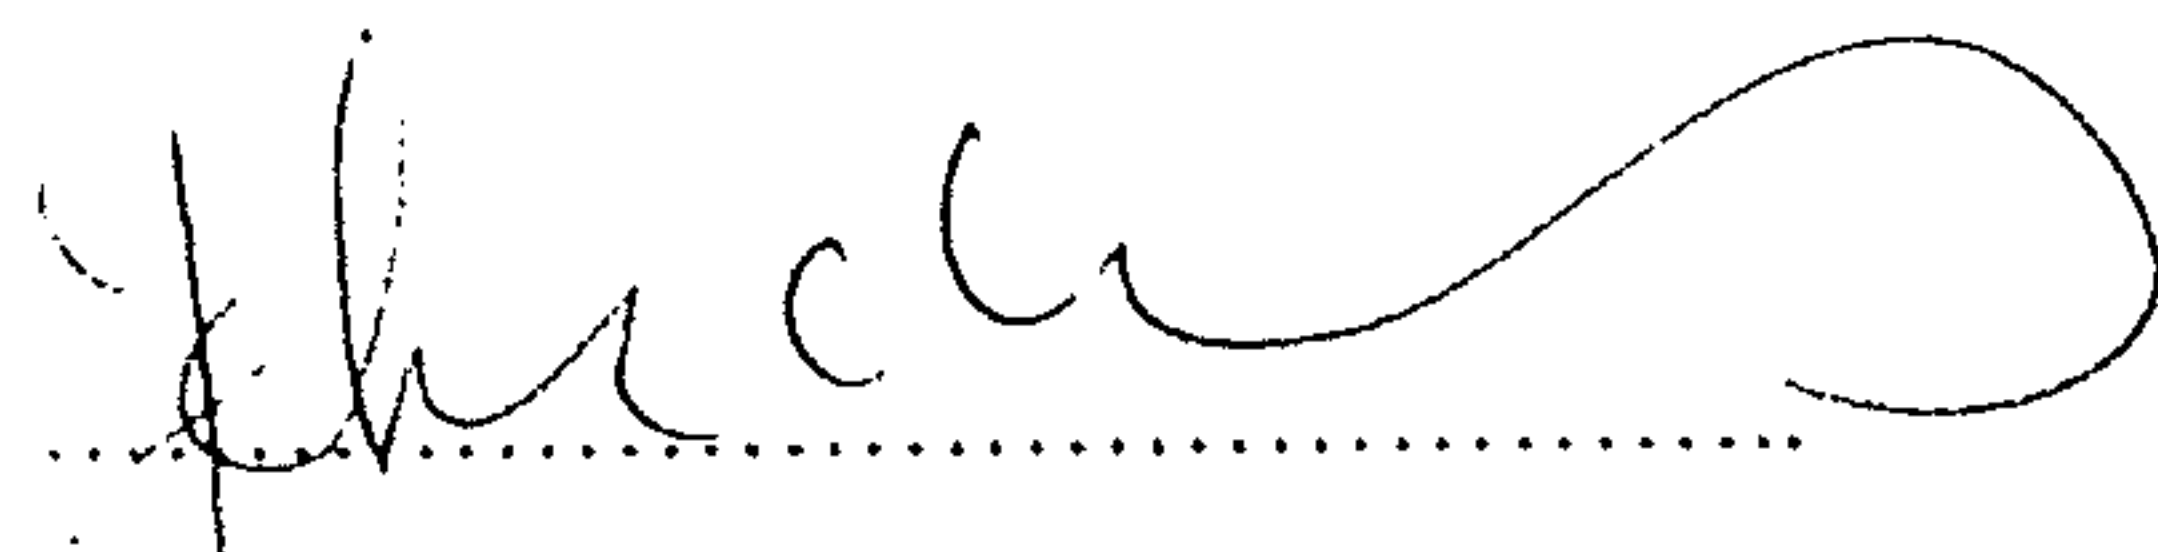

Dear Minister,

I am sure that you will have been informed of the content of the UTV Insight programme broadcast on Thursday 21st October 2004. The programme examined the cases of three children who had died while in hospitals in the North. Serious allegations were made concerning these deaths during the course of the programme which were directed not only against medical staff but also against members of a number of health trusts.

I believe that in order to prevent any further erosion of confidence by the public in the health service a full independent inquiry should be held to examine the full circumstances surrounding these deaths. I would ask you, as minister, to initiate such an inquiry immediately.

Yours, etc.,

Cllr John O'Dowd MLA
