

For the Crawford file.

Danzil will be focusing on.
Main focus is the Trust

- ① Accountability: Someone has to accept responsibility for Lucy's death.
- ② Call for an independent investigation into her death
- ③ Why was the apparent contradiction between CMO and Coroner.

Need to be given

- We will continuously go back to Lucy's death.
We need to move it forward @ every opportunity
- her death was a tragedy but it has been fully investigated by the coroner + we accept fully coroner's findings.
 - We now have in place guidelines deal with hypothermia. They were first in UK + have been commended by experts in fields.
 - Reporting systems could have been better @ time, we accept this. But ~~again~~ it was true across UK. Health Service is now working to develop robust reporting systems.

- ① Upfront fully accept coroners findings.
You are on record + CMO⁺ is on record, let there be no doubt about this.
- ② Using 2004 systems + procedures to judge something which happened in 2000.
- ③ New guidelines → praised
Developing approach on untoward deaths.
- ④ Confidence in the staff, the nurse, the doctors who have and are serving local community well.
- ⑤ Process followed by trust in line with expectation, not a whitewash.
They did tell Board + did involve outside doctor.
- ⑥ Learning lessons.
