PRINT NAME IN CAPS

In November 1995 I was a Registered General Nurse and a Registered Sick Children's Nurse. I qualified as an RGN in 1982 and as an RSCN in 1984. I started working in the Paediatric Intensive Care Unit in the Royal in 1989. My Nursing and Midwifery Council number is 79J0072N. I do remember Adam Strain being admitted to intensive care, however in relation to any details regarding his condition I have had to refer to the notes. When Adam was transferred from theatre I would have carried out observations on him and attached him to the monitors. In the notes any records signed K Knaggs were made by myself. I can confirm from the notes that my care for Adam was between midday and 2 pm when Staff Nurse Hall took over. I was not present during Adam's operation and do not know what happened during it. I would not be sure of exactly who was present during the operation. I know that Adam was a renal transplant patient and he come out of the operation with fixed dilated pupils. I do not recall if at the time there was any hand over from the theatre nurses. I also do not recall there having been any discussion in the unit as to the

STATEMENT OF: KATHRYN KNAGGS

cause of Adam's condition. I do not recall there having been any discussion regarding Adam's central venous pressure or the quantities of fluids Adam had received during his operation. I do not remember there having been any talk about the state of the kidney prior to the operation, or whether the kidney perfused or produced urine during the operation.
