In November 1995 I was a staff nurse in the Paediatric Intensive Care Unit and had been there since 1986. I am a Registered Sick Children's Nurse; my nursing and midwifery council number is 81A0240N. I don't remember too much about Adam Strain, however, I have read the notes and can say that I took over the care of Adam at 2.00 pm in intensive care after he had come out of surgery. Staff Nurse Knaggs had been caring for him up until then. I have read the records that I made at the time and can confirm that anything marked C Hall was made by myself. I have no recollection of there having been any talk or gossip in relation to the cause of Adam's condition. I was not present during Adam's operation and have no personal knowledge of what happened or who was present during it. I do not recall if there was any discussion regarding central venous pressure or the amount of fluids Adam had received. I also do not recall there having been any discussion regarding the state of the kidney at the start of the operation, whether it perfused during the operation and whether or not the kidney produced urine.
