What was the role -> scrub nurse -> procedure only
coming on at 8am -> took over from 1st scrub
nurse

To assist surgeons & all instruments,
As they require I could pass to them,

Remember when lots of it, -> don't have under
scrubbed in to take over.

Clear memory? Taken on of staff,
has left of staff.

Sarah Stottson

one of
-> circulating nurse.

I was there 8-12 o'clock -> then into ICB.

Things proceeded as normal

New kid -> discussion as to it being done
then seemed to be hope.

I was there for whole time

Caroline was my assistant -> I on table.

I took over from Patricia Conway.

Do not remember C. Murphy.

How many cases would normally be booked.
Only one I did this.

-> S.H may have been replaced.

③.

STATEMENT CONTINUATION PAGE

STATEMENT OF: _____

STATEMENT PAGE NO: _____

Don't know if either took a look - could mean describing.

Rules of Notes (part 1) - speaking technique - if an artist recalled something they could sort it. Similar side to an artist's eye. Both could be present.

Never worked with McKee before but had worked with Bain & Taylor & Langage before.

Of organized or expected.

Do not remember anything discussed or raised during the question.

At end of surgery - aware that they were concerned that Adam was not waking up - not panic - decision made to move him to ICU.

My role ended whenever Adam was seen up. No idea how long it was from him being seen up to Adam leaving theatre.

Do not recall anyone trying to rectify a problem.

Do not remember discussions re CUP.

CUP reading - can't remember where this reading would have been.

Do not remember discussions re quantity of fluid.

Do not remember any other discussions re history - referring, etc.

④. Saying it was not as pink as should be
Things soaked - surgeons decided they
could go ahead.

Can't remember if kidney produced any urine

No other contact with Adon.

Added over to paediatric notes in I/Os.

Nursing notes -> would have been completed at
beginning of surgery.

Scales are weighed -> dry packs weighed -> then a
running total is kept during the op to calculate
blood loss. Role of circulating nurse or nurses.
Suction bottle also calculated.
Should be no other notes by her.

Theatre notes are made by surgeons afterwards.

Kee was swollen at end (Gutty).

~~Not~~ Did not see Gee before

And all 2 surgeons would consult & communicate.
