

Letter

Dr Donaldson

Dear Dr Donaldson,

re death of Adam Strain, November 1995

Thank you for agreeing to assist in our investigation into the circumstances surrounding the death of Adam Strain. I am aware you ~~are~~ have some understanding of the background to the police investigation.

However in speaking to you on Thursday 6 April 2006 at 1915 hours I wish to seek your assistance in the following:

1. From your experience to be informed of the normal progress of a renal transplant operation. For example, I hope you will be able to advise me regarding the procedure for handling the new kidney, the expected times taken for ~~such~~ such an operation, the problems which a surgeon may encounter, the preparation expected ~~by~~ of the surgeon, the relationship between the surgeons and the anaesthetists, ~~and~~ the relationship between the surgeon & the assisting surgeon, and the parameters which are routinely monitored during such

an operation.

2. I ~~would seek your guidance on~~ the observations which a surgeon would make of a new kidney during such an operation, and what significance these may have.

3. I ~~would seek~~ the records which a surgeon may be expected to make during ~~if~~ or after such an operation.

4. Any opinions or comments which you may have from your consideration of the operation performed on Adam.

5. your notes ~~recorded~~ on the ~~medical~~ clinical record as provided to police by Dr Britton.

6. if possible, to discuss anything relevant from a contribution you made to a book by McGowan et al re renal transplant.

Clearly, I would ~~be~~ appreciate any other information which you believe may be of assistance.

If I can be of further help please contact me on [REDACTED]

Yours sincerely,
WATB & Cross
D/GV.
