Transmission Description: FAX FROM N7 DYER TO N40 BURTON RE FLUID MANAGEMENT

---

From: Les and Toni DYER FAX NO: [REDACTED] 05 JUL 2005 07:04PM

Hi Burton

Got your fax & e-mail from J Slavin. How could anyone refuse to meet with a mother who has lost a child?

As we have talked in past about Adam you know that I am of the opinion that Adam's fluid management was poor.

It must be stressed that I am not a paediatric anaesthetist and my opinions may cause the mother even more distress – if that is possible.

It concerns me that the RVH's inquiry by Doctor Fiona Gibson MD FFARCSI concluded that Adam had received a very carefully thought out and well managed anaesthetic with great care to fluid management, that no untoward episode took place, when the ultimate untoward episode, ie Adam's brain death has occurred, and that that death was related to fluid management.

Can there be a more flagrant example of the great white coat wall of silence.

See ya

Les
