Transmission Description: FAX FROM N7 DYER TO N40 BURTON RE
ERRORS N1 STRAIN DEATH

FROM: Les and Toni DYER FAX NO: [REDACTED] 15 Jul 2005 03:52PM

Hi Burton

Met with the Slavins last evening. Lovely couple.

Explained and emphasised the simplicity of the errors – bloody great mistakes that caused Adam's death.

Told them about CVPs and their potential risks. Obviously I was unable to explain Dr Taylor's wanton disregard for a CVP of 22cms H-O.

I attempted to answer some of their questions and expressed my disgust at Dr Gibson's assessment of Adam's anaesthetic/fluid management.

I taped most of the meeting and will send you a copy for your own info.

I hope that the Slavins are now adequately equipped to be their own advocate and I now withdraw my offer of free help to their appointed legal reps – not that they wanted it anyway.

Yours for Better Patient Care

Les
