Billy,
Thanks for that...sounds like a typical surgical plan to manage fluids.

I'm on holiday this week, but will look at the timeline and get back to you next week, if that's okay.

Speak to you soon

Sue

Hi Sue

Thanks for your time last week.

You remember we talked about a comment in the statement made by the sister on the ward (Miller), in which she said that the doctor had ordered a reduction in fluids in the afternoon. I have checked a Treatment Book which we have seized. This is used by the nurses to record what the doctors say of relevance as they do a ward round. It says on 8 June 01 in relation to Rachel - "Allowed sips later, S/B Surg Dr, analgesia, if drinking decrease iv fluids."

This may corroborate what Sr Miller had said.

If you need further clarification of the page faxed, contact me.

Billy
