Samantha

1. I have read the hand-written log. For Friday 8 June 01 it records Rachel Ferguson in Ward 1., aged 9, under Consultant Gill, with a mildly inflamed appendectomy. It then states "Allowed sips later, seen by surgical doctor, analgesia, if drinking decrease iv fluids."

You will need to check if there is a record that Rachel did drink, I do not recall if she did. There certainly is no reason to believe that the iv fluids were reduced.

2. Nothing surprising from the meetings. I have highlighted your comments to both and left your reports. Particularly asked Sue to check her opinions re 14 vomits, and proposed reduction in the fluids.

3. May be a conference next week.

Billy

When we met last week I think you mentioned that there was a hand-written log of the ward round for the Ferguson case. If there is could you send me a copy. Thanks.
Did anything more useful come out of the meetings with Sumner and Chapman last week?

Regards
Samantha
