Dear Norman,

re: Claire Roberts, [REDACTED]  
dob 10.1.87  
G.P.: Dr. McMillin, 220 Knock Road, Belfast 5

This 6 year old girl has been known to me since the age of 18 months. She attended the Assessment Clinic regularly but her mother had difficulty in accepting her mental handicap. Claire has no particular dysmorphic features. She did have convulsions from the age of 6 months until the age of 4 years and I am now discontinuing the Epilim.

Mother did not wish to have a CT scan carried out but did agree to have a chromosome analysis carried out in 1991. This showed a normal female karyotype.

Claire now attends Tor Bank School, has settled in well and her mother now enjoys helping with the children at Tor Bank. [REDACTED]

Yours sincerely,

Dr. Joan Major, M.B., D.C.H.  
Associate Specialist in Paediatrics
