Dear Dr. McMillan,

re: Claire Roberts, [REDACTED] (DOB 10.1.87)

Claire was reviewed at Outpatients on the 6th August at the age of 5 years 7 months. I was delighted to hear that she had had no convulsions since September 1991.

She continues to take Epilim 7.5 ml b.d. (300 mg b.d.) and her serum valproate level is satisfactory.

She should continue on the same dose and I have arranged to review her in 6 months.

[REDACTED]

Yours sincerely,

Dr. Joan Major, M.B., D.C.H.
Associate Specialist in Paediatrics
