

NORTHERN IRELAND NEUROLOGY SERVICE
EEG Dept.

BELFAST CITY HOSPITAL
Ext. No. 3123

EEG NUMBER C3086A

EEG Report

MR.
MRS.
MISS

FULL NAME
Roberts Clai.

CONSULTANT

Dr Major

WAR. VIC
O/P Ulst

DATE OF RECORDING

HOSPITAL NUMBER
U8706831

DATE OF BIRTH
5. 9. '96

The patient was — alert, drowsy, semi / un-conscious, unco-operative, ten — during the recording.

Dr Major 14/9
An excess of muscle potentials and movement artef. are recorded, however during 'quiet spells' the tracing shows frequencies from 5-9 Hz of amplitude 50-100 UV which are fairly symmetr. A few slower waves at 3-4 Hz of amplitude 70-120 uV are rded from the posterior regions. No specific waves seen.

Clinical Opinion

Awake record is technically rather poor due to constant movement but there is no obvious abnormality.

B.B. Sawhney
