Ian,

as discussed this morning, we need to inform David Webb. I'd be grateful if you could appraise him on my behalf.

Advise him that I would be happy to discuss and that we will keep him fully apprised of subsequent actions.

Michael

Michael

We met with Heather Steen this afternoon, and reached a measure of agreement about the role of the hyponatraemia. She wants to be present at the meeting tomorrow and will deal with any questions about the "Clinical Journey", while I deal with the fluid issues. Hopefully this will work – Heather has definite views about the significance of the fluid management, which are not quite the same as mine. Nicola will offer the parents the opportunity to meet with me separately if they wish to. Heather thinks it is important that someone should speak to David Webb in Dublin so that he is informed about what is happening – do you want to do this or will I try to contact him?

Best wishes

Ian
