ct:

Paediatric Cardiologist

CT may show coronal aortic dissection. Depends on time. Would reason for it have been apparent? No do it think so.

Prof Young's formulation of Death Cert - transect but not

(1) C aortic

(b) Mylgo

Copy document given to Clerk. Formulation Exhibit C7.

Cannot rank the importance of each of the causes at 1(b)

find between 8 pm - 2 am - would it have caused find overload? Agrees with Dr Bringham - Dr Young - not an important issue re what happened thereafter.

Mr M'Crear

main post 27/8/96

Allen Ward General paediatric Ward

v unwell. felt I needed specialist help.

what ever is wrong with clance outside our field? yes.

Contact Dr Webb? yes.

spent time with C's mum - contacted Mr. Steer -

152V noted mentally but would not have caused extreme

concern.

Paediatric Consultant unavailable? Dr Steer. Behemisto!

Dr S had not seen or examined clance?

Paed. Consultant unavailable. - kept informed by phone! now

Cannot remember if he spoke to Dr Steer.

Deferred to Dr Webb's expertise.

mid-afternoon - u say C's condition ~~not that~~ remained unchanged
little change from earlier am. (5.15 pm.)

Dr W's had seen and fully assessed C. v. grateful that he spent so much time with her.

5.15 pm C v. unwell despite intervention.

electrolytes taken at 9 pm - results 11 pm.

Had Dr W taken over care of C? uncertain by phone responding to him
Lancashire

Questions why parents not notified of C's ill health?

At: Complaints procedure learnt.
