Donna

If you look at all the statements the information contained within S/N Gilchrist's statement would appear to concur with what is said by others. J Johnston had gone to NNICU to speak to Dr Trainor therefore he had left the ward.. Dr Trainor states in her statement that she was in the NNICU at 4.15 and was asked to go the ward. This would mean going up one flight of stairs and would I feel take her 5 minutes.
