Martin  
I spoke to Phelim Quinn in RQIA to confirm where they were in respect of the follow-up visits that they had agreed to do as an outcome of their report into the application of NPSA Safety Alert 22: Reducing the Risk of Hyponatraemia when Administering Intravenous Fluids to Children. Their review, which was scheduled for June, will begin in September with self assessment followed by visits in October/November. The main focus of these will be on adult wards in which children are cared for.
