George,

Sorry for the delay in getting back to you. I can make further changes to this doc, but as it is not NHSCT work, I would need to make a charge for this service as income generation for my department.

Subject: Hyponatraemia Wall chart

David

Good afternoon.

At long last agreement has been reached by various clinicians and people within the DHSSPS on the logo and the information contained in the Hyponatraemia Wall chart for Children.

There has been a delay since June, as various clinicians had not agreed about the poster. Could I please ask if you could compile another simulation of the poster, which is to be in A3 format, so this may be helpful when you are working out the design.

DHSSPS Logo PARENTERAL FLUID THERAPY for CHILDREN and YOUNG PERSONS AGED
OVER 4 WEEKS and UNDER 16 YEARS Sept 2007

Amended June 2009

Initial management guideline

David I would be grateful if it could be set in the following way.

The main title has been emboldened .

Followed underneath by Initial management guideline.

To the left of the title is to be placed Sept 2007, with Amended June 2009 underneath are to go the words Amended June 2009.

The DHSSPS logo is to go on the left.

I have also included for guidance an attachment giving the original poster.

Many thanks for your help and happy to discuss.

George
