Subject: RE: Re-Issue of Wallchart Guidance on Treatment of Hyponatraemia in Children

Colleagues, further to my email below, can I please ask that one person responds on behalf of each Trust to let me know the numbers of wallcharts required. As I understand it, there should be enough ordered to ensure that they are on display in every bay in a paediatric ward as well as **anywhere else a child may be treated**.

Given the amendment, the old charts should be removed and destroyed when the new ones are issued. You should also factor in a reasonable number of wallcharts to be held as spares in case of redecorating, damage etc. The Department does not intend to hold a stock of wallcharts for replacements.

If you are not the right person to respond on behalf of your whole trust (ie paed and any other areas where children might be treated) I'd be grateful if you could let me know who I can contact.

As before, I'd be grateful if you can respond to [REDACTED] by close of play on Thursday 14th February.

Many thanks,

Jennifer

Subject: Re-Issue of Wallchart Guidance on Treatment of Hyponatraemia in Children

Colleagues, following the recent GAIN audits of compliance with guidance on treating hyponatraemia in children, it has been agreed to make a minor amendment to the above wallchart. The chart will then be re-issued to Trusts for display in all wards where children are or may be treated.

To that end, I would ask that you advise as soon as possible the number of wallcharts required for your trust in order to meet the requirements for display and add any additional charts required in order that your Trust has enough spare copies to allow for replacements over the next few years.

Please advise Jonathan Adair of the numbers required - [REDACTED] - by next Thursday 14th February.

Regards,

Jennifer
